

# SAROOT AREERATTANAWETCH

## Front-end Developer

### About Me

My dream job would be as a front-end developer. Since I was ten years old, I have been researching a lot of computer skills. Examples such as building lego-mindstorms and solar-cell robots. In high school, I enjoy working on projects like Arduino web development, and I believe I enjoy web development.

### Contact

### Coding Language & Skills

- C++
- HTML
- CSS
- JAVASCRIPT
- REACT
- NODE.JS
- Figma
- Tinkercad
- Canva
- Arduino
- Trading

### Education

**2017 - 2022** **PRINCESS CHULABHORN SCIENCE  
HIGH SCHOOL PHITSANULOK**  
{Sciences and Mathematics Program}

**2023 - Present** **CHULALONGKORN UNIVERSITY**  
{Bachelor of Engineering Program  
in Computer Engineering and  
Digital Technology}

### Activity

- POSN-Computer 2nd Camp (NU)
- STEAM4INNOVATOR Virtual Camp
- UNIHACK 2023

### Recent Projects

#### My Portfolio Website

- Using HTML | CSS | JAVASCRIPT and Deploy by Firebase
- My own site to show my profile and projects.

#### Online Learning Assistant

- Using python to make Face Detection and using HTML | CSS | JAVASCRIPT to make display website and using google sheet to store data
- An Add-on programs using with learning program (Ex. Zoom Google meet) to check whether students pay attention to study

#### Periodic Table Hunt

- Using HTML | CSS | JAVASCRIPT for Front-end, MongoDB for Back-end and Deploy by EC2
- A game that help you to remember element in periodic table

#### Electronic Large Gong Circle

- Using Arduino with C++ to make a circuits , Tinkercad for design structure, Mit app inventor for mobile application
- A Thai instrument Which is developed to new design with more functions
